

Important Operating Instructions and Warranty Information For Your New AMSEC Safe

MODELS:

TF5517E5 and DV Series Gun Safes with ESL5 Electronic Lock

Read Contents Carefully For Trouble-Free Operation of Your Safe

Dear Valued Customer,

Congratulations on your purchase of the finest safe from American Security Products Company.

You've taken an important step in organizing and protecting your most valued possessions. Every AMSEC safe is professionally hand-crafted and designed to provide a lifetime of trouble-free performance.

AMSEC offers the industry's finest warranty backed by a nationwide network of highly skilled authorized dealers, providing prompt, courteous, and professional service. We suggest that you read the Limited Warranty thoroughly, and invite you to contact your authorized AMSEC dealer or AMSEC's Service Department if you have any questions.

Please also take the time to read and familiarize yourself with the proper operating procedures of your new safe presented on the following pages.

Again, Congratulations and Thank You for selecting AMSEC!

Each AMSEC safe is professionally hand-crafted with quality materials and is equipped with a precision-quality, high-security combination lock. To become familiar with the lock, operate the lock (as outlined below) several times before closing the door and locking the safe.

OPERATING INSTRUCTIONS FOR THE ESL5 ELECTRONIC SAFE LOCK

Your AMSEC ESL5 Electronic Safe Lock has a Factory Combination of **C-1-2-3-4-5-6-#**

To open the lock, simply press the "C" key to clear and wake up the electronics. Now press the keys of the combination one at a time and finish with the "#" key. If the combination keyed is correct, the lock will cycle open for three (3) seconds. During this 3 second period, turn the handle of the safe to the unlocked position and pull the door open.

You may change your combination any time you like, and as many times as you like. Once your safe is installed, you must change the combination to a number sequence other than the Factory Combination of 1-2-3-4-5-6 to insure the safety of your valuables.

Here are a few things to remember:

- a. With each keystroke the keypad lights will flash off and a chirp will be heard, unless Stealth Mode is on, then no sounds are emitted during lock opening.
- b. If 4 (four) incorrect combinations are entered, the lock will go into a "Penalty Lockout" for 15 minutes to prevent trial and error manipulation attempts at opening the lock. The keypad will flash once every 5 seconds during the penalty period. If you press any key during the lockout period, the keypad will flash with a chirp 8 times rapidly to indicate the lockout condition.
- c. Before keying the combination, be sure that the handle of the safe is in the fully locked position to allow the lock to open freely.
- d. If the lock fails to open or acts strange, replace the battery with a good quality fresh 9 volt alkaline battery. To replace the battery, simply turn the keypad housing counter-clockwise to the stop and pull it away from the base. Un-snap the old battery and clip on the new one. Position the battery in the pocket of the housing and replace the keypad, watching that the wires fold neatly inside and are not pinched. You should replace your battery once a year to prevent corrosion damage from leakage.
- e. During the input sequence, if you make a mistake, you can press "C" to clear the previous input and start over again.
- f. The ESL5 uses a fixed length 6 (six) digit digit combination.
- g. Use only your fingers to key the combination. Sharp objects will result in damage which is not covered by warranty.
- h. If at any time during opening, or combination changing, the unit is left without input for 10 (ten) seconds, it returns to a resting condition. If this occurs during a combination change, the Old Combination is retained.
- i. At any time during opening or combination changing the unit will register the first 5 digits of the combination into the "buffer" that receives input. The 6th digit will be the last numeric key pressed. For example, if you press **C-1-2-3-4-5-7-4-5-2-7-6-#** the program recognizes only the C-1-2-3-4-5-6-# input. The last numeric key pressed continues to replace the one prior until the "#" key is pressed to indicate completion. This is a security feature that allows you to baffle an on-looker that may be trying to memorize your combination.

Quiet Mode –Silent Operation

The ESL5 Lock provides a Stealth Mode you can program so the Beeper remains silent during normal lock opening operation. To turn Stealth Mode ON (silent) or OFF (beeping):

ON: Press C-# (short warble tone), then 8-0-# (short warble), then 1-# (long warble).

OFF: Press C-# (short warble tone), then 8-0-# (short warble), then 0-# (long warble).

Combination Changing Instructions for the ESL5 Electronic Safe Lock

-- CAUTION --

Combination changes should always be done with the door locked OPEN.

To change the combination, do the following:

- a. Press the keys "C" and then "#". The unit responds with a short warbling tone (called the "good combo tone") and the keypad lamps strobe with the tone.
- b. Now key in the old 6 digit combination. The "C" key may be used to clear an error in keying at any time. Finish the input with a "#" key.
 1. If the old combination keyed matches the existing combination in permanent memory, another short good combo tone is sounded. Proceed to "c."

2. If the combination keyed is incorrect, the unit responds with 4 short beeps (called the bad combo tone) and returns to rest. The combination change routine is aborted and the old combination is retained. This also causes a count up for Penalty Lockout.
- c. Now key the first pass with the New 6 digit combination followed by a “#” key. Again, the “C” key may be used to clear an error in keying at any time.
 1. If the combination input is 6 digits in length, another short good combo tone is sounded. Proceed to “d.”
 2. If the combination keyed is not 6 digits long, the unit responds with 4 short beeps (bad combo tone) and returns to rest. The combination change routine is aborted and the old combination is retained.
- d. Now key the second (verify) pass with the New 6 digit combination followed by a “#” key. As before, the “C” key may be used to clear an error in keying at any time.
 1. If the combination input matched the first pass, a long good combo tone is sounded. The new combination replaces the old combination in permanent memory and the unit returns to a resting condition. Proceed to “e.”
 2. If the combination keyed does not match the first pass, the unit responds with the bad combo tone and returns to rest. The combination change routine is aborted and the old combination is retained.
- e. **Test your new combination several times prior to closing and locking the safe.**

OPERATING INSTRUCTIONS FOR THE DV652 SAFE DOOR

Before operating the DV652 safe for the first time, remove the two (2) tray clamping socket head cap screws located in the back of the safe. These screws can be removed using the supplied hex L key (Allen wrench).

After following the operating instructions for the ESL5 lock, (operating instructions 4305296), move the vault door operating lever (located above the digital lock) to the right to release and drop the vault door down. The sliding drawer can now be extended out of the vault.

After returning the sliding drawer back into the vault, the vault door can now be returned to the closed position. While holding the door in the closed position, move the operating lever to the left to relock the vault.

DV652 INSTALLATION INSTRUCTIONS

ANCHOR KIT (PART #1825075)

Your Defense Vault has been furnished with anchor holes and the necessary hardware to secure to the floor using this prescribed method.

Use the supplied hardware listed and drill the appropriate hole size and depth for the bolt size supplied.

Item No.	Qty	Part No.	Description
1	4	2665005	3/8" Lag Expansion Shield
2	4	244-0001	3/8" x 1-1/2" long Lag Bolt

CONCRETE FLOOR INSTRUCTIONS:

1. Place the Defense Vault in the desired location.
2. Open the Vault door, and extend the roll-out drawer.
3. Remove the hole plugs on the top of the vault and using a pencil, trace the holes in the bottom of the vault to mark the hole locations.
4. Move the Defense Vault and drill (4) 1/2" diameter x 2" deep holes.
5. Clean the holes and drop (1) Lag Expansion Shield into each hole.
6. Place the Defense Vault back over the holes, insert the Lag Bolts and tighten down the bolts.

WOOD FLOOR INSTRUCTIONS:

1. Place the Defense Vault in the desired location.
2. Open the Vault door, and extend the roll-out drawer
3. Remove the hole plugs on the top of the vault and using a pencil, trace the holes in the bottom of the vault to mark the hole locations.
4. Move the Defense Vault and drill (4) 9/32" diameter x 1-3/4 deep holes.
5. Place the Defense Vault back over the holes, insert the Lag Bolts and tighten down the bolts.

Limited Product Warranty

LIMITED WARRANTY—SECURITY SAFES & ELECTRONIC PRODUCTS

Product Category

Duration of Warranty

(Beginning from date of original consumer purchase / Proof of purchase necessary)

All Safes and related components 1 Year Parts & Labor

Electronic Locks and related components 1 Year Parts & Labor

What is covered and what is not covered:

This warranty covers all defects in materials or workmanship in this product, but DOES NOT COVER:

- (1) Damage, deterioration or malfunction resulting from:
 - a. Accident, negligence, misuse, abuse, improper installation, failure to perform normal maintenance or operation to follow instructions labeled on or provided in the safe.
 - b. Any damage incurred in shipment. (Claims must be presented to the carrier)
 - c. Repair or attempted repair by anyone other than a pre-authorized AMSEC service dealer.
- (2) Any unit which has been altered or on which the serial number has been defaced, modified or removed.
- (3) Normal wear, battery replacement or any periodic maintenance.

Who may enforce the warranty:

This warranty is only enforceable by the original purchaser.

What we will pay for and what you must pay for:

AMSEC will repair or replace units covered by this warranty, without charge to the consumer for labor and materials. YOU ARE RESPONSIBLE FOR ANY INSTALLATION OR REMOVAL CHARGES AND FOR ANY SHIPPING CHARGES. State sales tax does not apply to warranty service work and will not be honored. If safe components must be shipped for warranty service, AMSEC will pay the shipping charges to any destination within the USA if the repairs are covered by the warranty. Defective parts must be returned (not repaired unless instructed) to AMSEC. If parts are not returned, the warranty invoice will be denied.

How you can get warranty service:

- (1) If your AMSEC safe requires service, contact your local authorized AMSEC dealer and the dealer will advise you of the procedures to be followed. If this is not practical, contact the AMSEC Service Department at the address on front cover, or call 951-685-9680, ex. #1036.
- (2) All warranty service must have prior authorization, accompanied by proof of purchase as evidence of warranty coverage. A warranty authorization number must be obtained from AMSEC before any service work is performed. The serial number, description of product and description of problem must be supplied to AMSEC to determine warranty status before an authorization number will be assigned. Issuance of the authorization number recognizes only the existence of the problem and does not constitute an admission of liability by AMSEC. Only approved service representatives will be authorized to perform warranty service. Any service performed prior to issuance of a warranty authorization number will be subject to denial.

Limitation of Implied Warranties:

Any implied warranties, including warranties of merchantability and fitness for a particular purpose, are limited in duration to the length of this warranty.

Exclusions of Damages:

AMSEC's liability for any defective products is limited to repair or replacement of the product, at our option.

AMSEC shall not be liable for damages based upon inconvenience, loss of use, damage or loss of contents, or any other damages whether incidental, consequential or otherwise.

CAUTION FIRE SAFE CONTENT STORAGE

A fire safe contains insulation material, which may cause humidity to be present when closed for extended periods of time. It is recommended that the safe is opened on a regular basis and interior allowed to air out. It is also recommended that documents sensitive to moisture be kept in a sealed container, I.E Ziplock® or Tupperware®.

MAINTENANCE

Standard Textured finish: Your safe is provided with a durable paint that may be easily cleaned with a mild detergent and a soft cloth. **Do Not** use abrasive scouring pads or any chemical fluids, which may react and damage the finish.

Hi-Gloss Finish: This finish is a two-stage paint, which is the same used in the automotive industry. Use a damp cloth with mild detergent if needed. A good grade of automotive wax is recommended if the finish appears dull. **Do Not** use abrasive scouring pads or any chemical fluids, which may react and damage the finish.

Door Operating Mechanism: The handle of the safe moves mechanical parts inside the door. After a period of use, if difficulty is experienced in operation, please contact a qualified locksmith for service.

Door Hinges: If the door becomes hard to open or emits noise, the hinges may need lubrication. Please contact a qualified locksmith for service.

Caution: AMSEC assumes no liability for finish damage due to the incorrect use of caustic lubricants.

DAMAGE CLAIMS

Freight Damage: All safes are carefully packed for shipment. The manufacturer's liability ceases when the transportation carrier accepts the shipment in good condition. The carrier's liability ceases when you sign for the merchandise. **INSPECT YOUR SHIPMENT BEFORE SIGNING THE DELIVERY RECEIPT.** Although unlikely, if damage occurs you have the option of refusing the shipment or negotiating a settlement with the carrier. To negotiate a settlement follow these steps:

1. Note the extent of the damage on the freight bill and sign your name.
2. Save all cartons and packaging materials.
3. Call the freight carrier immediately and request a damage inspection claim.

ALL CLAIMS:

1. Contact your dealer immediately.
2. Claims must be filed within 15 days.
3. Claims must be accompanied by proof of purchase receipt and photographs.
4. In the event of replacement, the safe must be returned to the dealer/factory in the original packaging.
